

Security Copilot Automations and Everything New!

Shruti Ailani

Sr. Global Black Belt, Security & AI, Microsoft EMEA

Professional Public Speaker

Budding writer: <https://medium.com/@shrutiailani>

Intro & Pulse check

Recap Basics (L100)

Advanced
automations (L300)

What's NEW

NEW Pricing model
& Call to action

Agenda

- Recap Basics (L100)
- Advanced Automations (L300)
 - Plugins
 - Promptbooks + Logic Apps
 - User analysis
 - SCP API
 - Task-based approach
- What's NEW
 - Pricing Model
 - Workspaces
 - Agents
- NEW Pricing model & Call to action

NOT on the Agenda

- Details of Embedded experience
- Deepdive into OOTB Agents
- MCP Servers
- How to create agents with copilot studio and azure AI foundry

Peeling the layers of Microsoft Security Copilot

Making AI a force multiplier

Cyber skills and promptbooks

+

Evergreen threat intelligence

+

Plugins

+

Security-specific orchestrator

+

Hyperscale infrastructure

+

OpenAI + Microsoft Security

Prompt: Describe CVE-2023-5631

with Copilot

Meet you where and how you work

Embedded

Offers the intuitive experience of getting Copilot guidance natively within the products that your team members already work from and are familiar with

Standalone

Helps teams gain a broader context to troubleshoot and remediate incidents faster within Copilot itself, with many use cases in one place, enabling enriched cross-product guidance

Automation

Helps teams accelerate response with built-in and custom promptbooks as well as integration with Logic Apps

Data flow for Microsoft Security Copilot

Elevate your security program with Copilot

Security operations

Junior SOC analyst

Accelerate investigation and remediation

Reverse engineer malicious scripts

Senior SOC analyst

Automate advanced tasks

Reverse engineer malicious scripts

Threat intelligence (TI) analyst

Enrich analysis with unified TI

Accelerate threat hunting

CISO and security team

Get executive summary and detailed reporting

Beyond the SOC

Data sec admin

Proactive data security posture management

Discover protection gaps and streamline controls

IT and identity admin

Risk investigation

Accelerate IT troubleshooting

End-to-end security at machine speed and scale

Rapid investigation and response

Investigate with AI-assisted insights and quickly pivot to remediation with actionable, prioritized recommendations.

Scaled visibility

Quickly assess security posture, threats and policy or compliance gaps. Access summaries with context to understand the potential impacts.

Faster troubleshooting

Get deep understanding of device, user, access, and app status to resolve issues quickly. Find and remediate policy issues faster with natural language prompts.

Advanced skills unlocked

Script analysis and natural language to KQL and KeyQL empower any team member to complete complex tasks with confidence.

Microsoft Security solutions	Available in the standalone experience	Available as an embedded experience
 Microsoft Defender XDR	✓	✓
 Microsoft Sentinel	✓	✓ *
 Microsoft Intune	✓	✓
 Microsoft Entra	✓	✓
 Microsoft Purview	✓	✓
 Microsoft Defender for Cloud	✓	✓

*Available as part of the Unified Security Operations Platform.

Security Copilot

- 1) Let us know which **use cases** you would like us to showcase more (1:1 or over LinkedIn)
- 2) Let us know which **agents** you'd be the most interested in and enroll in gated-public previews
- 3) Try out 1 **logic app-based** automation + 1 **agent-based automation** today in your environment
- 4) A few **resources** we'd like to leave behind
